予Abstractツ In the context of "Internet +", Internet + traditional industries are not simply the addition of industries, but model innovation and new economic formats. Internet + circulation, Internet + manufacturing and Internet + medicine have derived medical e-commerce. Pharmaceutical e-commerce is a segmented market after the mature development of e-commerce, which not only has the characteristics of e-commerce, but also integrates the characteristics of "Internet +" and medicine. Based on the ecosystem and e-commerce ecosystem theory, this paper constructs a pharmaceutical e-commerce ecosystem, and proposes some development paths, including the application of ecosystem thinking, the connection between medical insurance and e-commerce, and the improvement of pharmaceutical e-commerce logistics resources.
