Clinical study on the improvement of cardiac function in uremic hemodialysis patients by high flux dialysis

# 形威啉 Wu Yongsheng (翳污蹲卑玩吊蛏哞搐冽 污甸辽弘 065400)

(Department of Nephrology, Xianghe County People's Hospital, Langfang, Hebei 065400)

【摘 要】目的:探讨分析在临床以血液透析方案治疗尿毒症患者时应用高通量透析手段的帮助效用。方法:回顾性分析 2021 年 1 月至 2022 年 1 月期间内,选取来我院肾内科就诊的尿毒症患者共 80 例作为研究对象,按照治疗方式的异同将参研患者均分成两组各 40 例。对照组接受单一血液透析作为治疗方案,研究组加以应用高通量透析手段,对比两组患者的各项血液激素指标、治疗前后左心室数据指标变化、心脏功能指标变化以及肺功能指标变化。结果:研究组患者各项血液激素指标相较于对照组更佳,左心室各项数据指标改善效果也相对更加明显,心脏功能表现更良好,肺功能总体评分更高。四组数据对比均存在差异 (p<0.05)。结论:肾内科临床治疗尿毒症患者时,应用高通量透析手段辅助血液透析治疗,不仅能改善患者血液激素指标,还能促进患者心肺功能的康复,临床具有推广意义和应用价值。

[Abstract]Objective: To explore and analyze the help effect of high flux dialysis in the clinical treatment of uremic patients with hemodialysis. Methods: Retrospective analysis was made on 80 uremic patients from January 2021 to January 2022 who came to our hospital for treatment in the department of nephrology. According to the similarities and differences of treatment methods, the patients involved in the study were divided into two groups of 40 patients each. The control group received single hemodialysis as the treatment plan, while the research group used high flux dialysis to compare the changes of various blood hormone indicators, left ventricular data indicators, cardiac function indicators and pulmonary function indicators of the two groups of patients before and after treatment. Results: Compared with the control group, the patients in the study group had better blood hormone indicators, and the improvement effect of various data indicators of the left ventricle was also relatively more obvious. The cardiac function performance was better, and the overall pulmonary function score was higher. There were differences among the four groups (p<0.05). Conclusion: In the clinical treatment of uremic patients in nephrology department, the use of high flux dialysis as an auxiliary means of hemodialysis can not only improve the patient's blood hormone indicators, but also promote the rehabilitation of the patient's cardiopulmonary function. It has clinical significance and application value.
